

2630B Grind Downdraft Table for Hot Work

The Model 2630B Grind Downdraft Table is designed to accommodate a variety of sanding, metal grinding, welding, and light plasma applications where sparks and high temperatures are present. At the heart of the system is a blower that can produce up to 1500 cfm of airflow @ 1" static pressure to contain debris.

*Pictured with casters, which are standard

Dimensions: 26"D x 30L"36" T
Motor: 1 HP, 120 /1/60 PLUG-N-GO
CFM: 1500 @ 1" H2O
Warranty: 3-years limited

Other voltages & table sizes are available

A removable all steel spark shield with hinged ends provides spark protection for area workstations. Tabletop surface is composed of durable 1/4" metal plate or grating. Push a button and compressed air blows dust from the filter, dropping dirt into the dustpan

below. Automatic filter cleaning done by a timer is optional. Shielded and fire rated cartridge filter cleans 99.95% of particle size .5 micron and larger.

Newly designed water pans offer easy exterior access for water maintenance. A filter / dustpan door allows easy dirt removal and filter access.
