

## Omega Series HEPA/ULPA ESD Vacuums

IAS Introduces their new HEPA and ULPA filtered Clean room vacuums. Exceeds Class 100,000 ESD safe EMI & RFI suppression.

Ideal for:

- Board handling
- Equipment assembly
- Clean room contractors

The Omega Series HEPA/ULPA vacuums come standard with a true HEPA cartridge filter (or optional ULPA cartridge filter), 10' ESD safe hose, 16" ESD safe rubber flexible gooseneck, and power cord to clean sensitive manufacturing equipment, electronics, cabinets, computers, and copy machines.

With the standard non-ESD safe 5.5" utility brush, larger areas such as floors, raised floors, and tabletops can be cleaned.

In addition, these Clean room vacuums are EMI/RFI filtered, so they are perfectly safe to be used in and around electronic equipment.

Ergo-Fit back pack option.
